Professional Summary

IT undergraduate with a passion for turning complex data into meaningful business decisions. Proficient in Python, Power BI, and SQL, with hands-on experience building analytics dashboards, machine learning models, and AI-powered systems. Demonstrated ability to work with large-scale datasets, including delivering a 100K+ order analytics dashboard and an intelligent compliance system for a leading pharmaceutical organization. Currently developing a donor classification model using supervised learning techniques and actively seeking an internship to apply these skills in a real-world data-driven environment.

Education

BSc (HONS) IN INFORMATION TECHNOLOGY

2024 - Present

Department of Industrial Management | University of Kelaniya

Skills

Data Visualization : Power BI (Advanced), DAX, Excel

Data Analysis & Engineering : SQL, Data Cleaning, EDA, Data Transformation, Data Validation, Data Pipelines

Machine Learning : Scikit-learn, Classification, Regression, K-Means Clustering, Feature Engineering, Data Preprocessing

Programming : Python (Pandas, NumPy, Scikit-learn, Matplotlib), Java, JavaScript

Databases : MySQL, MongoDB, Relational Data Modeling

AI & GenAI : LangChain, RAG, HuggingFace Embeddings, Groq (Llama 3), Streamlit ChromaDB,

Academic & Personal Projects

Olist E-Commerce Sales Analytics Dashboard

March 2026

- Ingested and integrated 9 relational datasets (~100K+ records) using Power Query, performing data cleaning and preprocessing by handling missing values, correcting inconsistencies, and standardizing data formats
- Applied data transformation techniques to reshape and merge datasets for unified analysis
- Designed a star schema data model to optimize relationships between fact and dimension tables
- Implemented a structured ETL workflow (Extract, Transform, Load) to ensure data quality, consistency, and reliability
- Developed DAX measures and calculated columns to support business queries on sales performance, customer behavior, and operations
- Built interactive Power BI dashboards to visualize insights and ensured data accuracy through validation checks and cross-table consistency analysis

Tech: Power BI, Power Query, DAX, Excel, Star Schema Modeling

Donor Prediction System – ML Pipeline Development (Ongoing)

Feb 2026 – Present

- Built an end-to-end data processing pipeline to ingest raw donor data (CSV/Excel), transform it into analysis-ready datasets, and integrate with downstream ML models
- Conducted data cleaning and preprocessing including missing value handling, duplicate removal, and inconsistency resolution across all pipeline stages
- Applied feature engineering and data scaling techniques to standardize numerical features and improve model usability
- Implemented K-Means clustering for donor segmentation, identifying behavioral patterns to support targeted decision-making

Tech: Python, Scikit-learn, Clustering, Classification, Regression, NumPy, Pandas, Matplotlib

Hemas PharmaComply AI – Automated Regulatory Compliance System (Group)

Jan 2026

- Led development of the Impact Predictor module which matches real-time price changes to internal product catalogs and auto-generates actionable business plans
- Integrated and merged teammates' modules (Q&A, deadline tracker, risk evaluator, change detector) into a unified pipeline

Tech: Python, LangChain, Groq (Llama 3), ChromaDB, HuggingFace Embeddings, Tesseract OCR, pypdfium2, Streamlit

Certifications

Skills for Work - MAS Holdings

May 2026

University of Kelaniya

The Complete Excel Pivot Table: Data Analysis and Reporting

Feb 2026

Udemy

What is Data Science

May 2025

Coursera | IBM

Extra Curriculars And Achievements

Detail Handler, Magazine Designer

July 2025 - April 2026

LED KLN Club | University of Kelaniya

Finalist (Top 10)

April 2026

AITHON 2026 | Hemas Holdings

Finalist (Top 5)

Dec 2025

Venture Verse 2025, Sabaragamuwa University

Finalist (Top 10)

Sep 2025

Technopreneur Challenge, CodeFest 2025, SLIIT
